Specifications and prices Type: Terres-Roads, Flowflex Flowstander Controllers: 32 mm Folded ribbon, 5.25", ~ medium, (2) 6" Woofers Frequency Response: 37Hz, Nominal impedance of 27 KHz: 4 Ohms Sensitivity: 88db Dimensions: 8.33" x 37.6" x 11.6", Weight: 40 lbs. The utilitarian vinyl, textured replaces the traditional brightness layers on the side and rear panels, but the front is well finished in multiple black satin lacquer applications. Removable grids are magnally joined for a clean look. The largest of the AirMotiv series, the T1 is a four-conductor system in a Bass-Refight configuration with a rear shooting port located near the foot of the rear panel. There was a fully integrated facility and naturalism for female and male singers, without any of the rising tank tank hinks of so many speakers with a modest price. Some of the textured, tonal and dynamic linearity of an expensive study monitor is lost. Both are studies in a "Slam" with a heavy bass response.
